colour palette

Blue Charcoal is the brands primary shade, it should be used in place of black wherever possible. Cream can be used in place of white in designed elements, however chose white if more appropriate e.g for a document background.

Aqua is the brands main colour and should be chosen in the majority of cases as the primary colour to build strong and cohesive brand idenity over the brands lifespan.

The 3 colours; Blood Orange, Aqua, and Green have been selected to compliment Blue Charcoal and should always be used as a compliment to it.

The Dark, Mid and Light tones are provided as fallbacks if a certian application would suffer in accessability from the primary colours, they shouldn't be used in conjunction with the main tone.

Our primary typeface is Acumin Variable Concept.

This is a Sans-serif typeface with customisable properties. Most fonts give you set styles; i.e Regular, Medium, Bold, however we have full control over the properties of this font.

Wide Medium is our heading font, used in the logo. It has a distinctive look with its wide tracking.

Heading design practise

It can be used with its accompaniment Wide Light for a contrast look.

It can be used all lowercase as part of our strong brand identity.

Wide tracking is preferred, but not essential.

Body design practise

A similar Sans-serif font can be used as a fallback if Acumin Variable Concept isn't available. Arial is recommended.

**These titles aren't the standard settings for the typeface, they need to be created to match the properties listed below.*

Logomark
Our logomark is the compass. This is rotated 35 degrees clockwise.

We have 3 versions all created from the same initial shape, for application in different sizing and context; Main, Simple and Colour.

Logotype
Our logotype takes 2 forms suited to different applications that require different aspect ratios; Linear and Stacked.

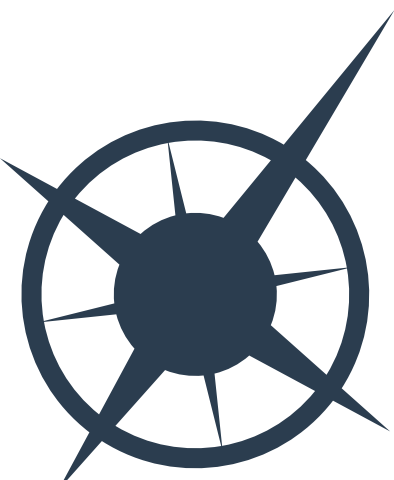

Linear and Stacked are developed to incorporate the 'Simple' compass logomark. This version should be seen as the primary logotype, with the more stripped back to be used when required.

Refer to 'typography' page for the logo's composition and properties, formed from our typeface.
